

GenAI Usage Acknowledgement Form

COMP40511 – Applied Artificial Intelligence

Student Name: Rajani

Student ID: N1326076

Module: COMP40511 – Applied Artificial Intelligence

Assessment Title: Application of AI in Solving Real-World Problems

Date: 25 May, 2026

Declaration of Generative AI Usage

I confirm that I have used Generative AI tools during the completion of this assessment, as detailed below.

GenAI Tool(s) Used

Tool	Purpose of Use	Extent of Use
Microsoft Copilot (NTU)	Understanding Python library features (TensorFlow, Keras, scikit-learn) and syntax guidance	Used to look up API documentation, understand function parameters, and clarify library usage
IDE Code Completion	Suggested code completions while writing Python scripts	Accepted/rejected suggestions; all code was reviewed and verified before use

How GenAI Was Used

- Learning & Understanding:** Used AI chatbot to understand relevant Python language features and library components (e.g., Keras model construction, scikit-learn ensemble methods, OpenCV image loading, matplotlib visualisation).
- Code Suggestions:** Used AI to get code suggestions for common patterns (e.g., data loading pipelines, model architecture templates, evaluation metric computation). All suggestions were reviewed, understood, and verified before incorporation.
- Debugging Assistance:** Used AI to help diagnose and resolve coding errors during development.

What Was NOT Done by AI

- All implementation decisions, model architecture choices, and parameter tuning were carried out by myself.

- All evaluation, analysis, and interpretation of results were performed by myself.
- The report was written entirely in my own words.
- The demo video was recorded and narrated by myself without AI-generated content or scripts.
- All steps of the tasks were carried out by myself to demonstrate my own development skills.

Verification

I confirm that:

- ☒ I understand all code submitted as part of this assessment.
- ☒ I have verified all AI-generated suggestions before incorporating them.
- ☒ I have not used AI agents to autonomously complete tasks on my behalf.
- ☒ I have not used AI to generate the demo video content or script.
- ☒ All critical thinking, analysis, and evaluation are my own work.

Date: 25 May, 2026

This form is submitted in compliance with NTU's GenAI usage acknowledgement requirements for COMP40511.
